PROFESSIONAL SUMMARY

Experienced in software engineering with expertise in Aras PLM, ANSYS Minerva SPDM, and C#. Skilled in developing and deploying custom solutions, performing code reviews, and mentoring teams. Adept at optimizing performance and integrating third-party applications using various technologies.

EXPERIENCE

01/2024 - Present

Sr. Software Engineer

KPIT Technologies | KPIT Technologies,
Bengaluru, Karnataka

- Understanding & Analyzing Aras Product Life Cycle Management Archi structural implementation with OOTB functionality.
- Involved in Deployment of New Versions of Ansys Minerva Product in Multi structural Environment.
- Implemented and configured Custom Dashboards & Widgets for identity groups in Minerva.
- Familiar with configuration folder level permissions, creation of new identities, groups.
- Configuring Workflows, Lifecycles, custom File types, defining classifications, file preferences and Metadata Properties
- Performed code reviews to ensure quality standards were met by development teams.
- Sprint Planning and Task allocations.
- Mentored newly hired software engineers

through routine coaching and training opportunities.

01/2020 - 01/2024

Lead Developer

ITC Infotech India Pvt Ltd | ITC Infotech India Pvt Ltd, Bangalore

- Understanding & Analysing Aras Product Life Cycle Management Archi structural implementation with OOTB functionality.
- Involved in Deployment of New Versions of Ansys Minerva Product in Multi structural Environment.
- Implemented and configured Custom Dashboards & Widgets for identity groups in Minerva.
- Familiar with configuration folder level permissions, creation of new identities, groups.
- Configuring custom Filetypes, defining classifications, file preferences and Metadata Properties.
- Implemented required Configurations for Non Ansys applications and writing python scripts to launch like Ansys Siwave, CST.
- Implemented Multi version application launching by adopting python scripting from Data Management in Minerva.
- Enhancing new functionalities over Work request & Data management etc.. with help of C# and JS for addons in Minerva.
- Implementing custom Work request templates, tasks and associated to the work request.
- Involved and understand the Work request creation, product Simulation and capturing results in Deliverables.
- Implemented custom Viewers, Relationship tabs, Workflows, life cycle states, Voting Dialog box in WO.
- Enabling Custom metadata Extraction, 2D&3D visualizations, Graphs for Non Ansys Products in Minerva.
- Involved in integrating third party applications with Minerva to complete Simulation process for

Windchill PLM tool.

- Having familiar with innovator admin tool for creating, execution of AML and SQL queries, installing package items in client environments.
- Involved in Prepare and execution of test cases on various scenarios.
- Performed Minerva Web application upgrade using Git extensions and familiar with p4 merge tool.
- Work closely with the project managers, business stake holders, infrastructure and development teams to help deliver solutions within the budget and designated timeframe.
- Reviewed existing codebase for bugs or security vulnerabilities and implemented fixes accordingly.
- Refactored legacy codebase for increased scalability.
- Mentored junior developers to help them with coding challenges.

09/2017 - 12/2019

Support Engineer

ITC Infotech India Pvt Ltd | ITC Infotech India Pvt Ltd, Bangalore

- Responsibility for Develop & Support for multiple applications using SQL script and SAP MM module.
- Familiar with Remedy force ticketing tool system for troubleshooting and closing supplier issue on time.
- Experienced in defining and executing characteristics for materials in SQL.
- Writing stored procedures for generating Labels for materials in SQL.
- Creating and defining auto execution of SQL jobs for receiving and confirming of Materials from SAP system.
- Enhanced new scripts functionalities to generate reports for analyzing of materials on weekly basis.
- Familiar with execution of various keycodes related to SAP analyze issues occurred over

shipment delivery process.

- Good knowledge of Kone Supplier Management tool for Creation of users, providing access and creating proxies.
- Coordinating and implementing custom business templates for KSMP tool.
- Familiar with Liaison service portal to track and troubleshoot orders and implementing fixes within SLA.

06/2015 - 06/2017

Senior Support Engineer

ITC Infotech India Pvt Ltd | ITC Infotech India Pvt Ltd, Bangalore

- Supporting, maintaining, enhancing more than 25 plus applications using Sitecore CMS, Azure SQL.
- Working share point ticketing tool and resolving issue on time.
- Familiar with creation, restoring SQL data bases and new machines in Azure cloud.
